

# Microsuede Fabric

Microsuede fabric is a stylish alternative to suede with wonderful advantages. Composed of millions of microfibers, it has the soft hand of natural suede leather, but none of its drawbacks. Long lasting and stain resistant, this faux suede fabric is perfect for furniture that will see a high volume of use or spills. It's 100% vegan, but looks and feels like the real thing. With a stylish look and two gorgeous color options, these fabrics will be a welcome addition to any décor. Our microsuede fabrics come standard on select Golden power lift recliners.
